EXECUTIVE PROFILE

Software engineer with more than 25 years of experience designing, building and evolving enterprise software products. Specialized in enterprise SaaS, architecture and full-stack engineering, with recent hands-on experience building AI agents, multi-tenant AI platforms and enterprise integrations. Experienced across the product lifecycle, from technical strategy and implementation to deployment and continuous evolution.

ENGINEERING EXPERTISE

Product Engineering	Enterprise SaaS | ERP | AI-powered Products | Business Automation
Architecture	Multi-tenant | REST APIs | WebSockets | Event-driven Design
AI Engineering	OpenAI | AI Agents | Tool Calling | Conversational Context
Agentic Development	AI-assisted Coding | Agent-based Development Workflows
Technical Leadership	Architecture | Mentoring | Product Collaboration
Frontend	Angular | React | TypeScript | RxJS
Backend	Node.js | NestJS | Express
Cloud & DevOps	AWS EC2 | Docker | Linux | Apache | CI/CD
Data & Mobile	MongoDB | PostgreSQL | SQL Server | React Native | Ionic

PROFESSIONAL EXPERIENCE

MANAX

Senior Product Engineer
Enterprise ERP Platform • Spain (Remote) • 2023 – Present

Modern Enterprise SaaS ERP platform covering workforce management, CRM, projects, scheduling, billing, contracts and operational workflows.

- Lead the evolution of enterprise ERP capabilities across multiple business domains.
- Design scalable software architecture for complex operational workflows.
- Build AI agents with OpenAI, tool calling, enterprise actions and conversational context.
- Architected a reusable multi-tenant AI platform with embeddable assistants,
- business integrations, usage metering and real-time chat via WebSockets.
- Use agent-assisted development workflows and contribute to Linux/AWS deployments.

Tech Stack

Angular • React • TypeScript • Node.js • NestJS • MongoDB • Docker • AWS • OpenAI • REST APIs • WebSockets

HEALTHCARE PLATFORMS

Senior Software Engineer

Hospital Central de Mendoza • Hospital Universitario • Sociedad Española • Red Salud • Médicos 3.0

2004 – 2021

More than 15 years designing, modernizing and evolving mission-critical healthcare software. Delivered Hospital Information Systems (HIS), Electronic Medical Records (EMR), ERP modules, billing, appointments, emergency care, telemedicine and government integrations.

- Led the modernization of legacy healthcare platforms, migrating core business systems into modern web-based architectures while preserving operational continuity.
- Designed and evolved HIS, EMR and ERP solutions supporting clinical and administrative operations.
- Delivered software for appointments, billing, emergency care and telemedicine.
- Built integrations with government and regulatory organizations.
- Worked directly with healthcare professionals to translate clinical processes into reliable software.
- Participated in architecture decisions, data modeling, platform evolution and mentoring.

Tech Stack

MEAN Stack • Angular • TypeScript • Node.js • MongoDB • Perl • Catalyst • HTML • JavaScript • SQL Server • MySQL • Linux

PRONET

Technical Lead / Senior Software Engineer

Software Factory • Argentina • 2021 – 2023

Software development company delivering enterprise software solutions for public and private organizations. Served as the technical lead for the development area, coordinating engineering efforts while remaining actively involved in software architecture, implementation and customer delivery.

- Coordinated software development activities, providing technical direction, code reviews and engineering guidance across multiple projects.
- Acted as both Technical Lead and Senior Software Engineer, adapting to project size and customer requirements.
- Designed and implemented enterprise software solutions while collaborating directly with customers and business stakeholders.
- Led modernization initiatives focused on maintainability, scalability and long-term product evolution.
- Played a key role in the continuous evolution and maintenance of the COVIAR management platform.
- Contributed to architecture decisions, backend services, frontend development and full-stack solution delivery.

Tech Stack

Angular • TypeScript • Node.js • NestJS • MongoDB • SQL Server • Docker • Git

Other Career Highlights

Contributed to enterprise software projects across healthcare, consulting and international organizations, building experience in software architecture, legacy modernization and business-critical applications.

- Enterprise software consulting
- Healthcare information systems
- International development initiatives
- Legacy modernization projects
- Full-stack web application development
- Database design and optimization
- Systems integration
- Business process automation

Organizations

Intelifaz software factory • World Bank initiatives • Additional enterprise consulting projects
